Change Advisory Board Packet

Pricing governance, workflow automation, and data-quality release

Work sample context: Sanitized professional work sample documenting Brian Lloyd's applied skills and experience. Organization-specific identifiers and confidential data have been removed.

Executive summary

This portfolio CAB packet documents a governed release spanning pricing controls, automation, data quality, monitoring, enablement, and rollback readiness.

Change scope

Component	Change
Product pricing	Governed fields, tier configuration, and Price Book Entry automation.
Opportunity pricing	Price-exception record, approval routing, parent status, and notifications.
Data quality	Stage, Close Date, price-range, and duplicate-management controls.
Enablement	SOPs, quick references, UAT designs, and change notes.
Monitoring	Fault logging, reconciliation, and executive control measures.

Risk assessment

Risk	Rating	Mitigation
Incorrect tier pricing	Medium	Configuration validation, approval thresholds, reconciliation, and rollback backup.
Approval routing failure	Medium	Configuration-error path, fault logging, and monitored aging queue.
User disruption	Low	Role-based enablement, release notes, and quick references.
Reporting inconsistency	Low	Post-deployment audit and dashboard refresh validation.

Test and evidence plan

- Execute the Opportunity Product approval and data-quality UAT designs.
- Capture Actual Result, Status, and Evidence File during formal execution.
- Validate bulk, permission, missing-configuration, approval, rejection, and fault paths.
- Reconcile Price Book Entries and refresh control dashboards after deployment.

Deployment plan

- Confirm approved metadata version and configuration.
- Back up governed pricing and relevant configuration.
- Deploy during the approved change window.
- Activate automations in the defined sequence.
- Run smoke tests, reconciliation, and monitoring checks.
- Communicate completion and support instructions.

Rollback plan

- Stop further automated processing by deactivating affected Flows.
- Restore the prior metadata version.
- Restore or reconcile impacted Price Book Entries from the approved backup.
- Notify stakeholders and open an incident record.
- Complete root-cause review before a new deployment request.

Required approval roles

- CRM Product Owner.
- Pricing Manager.
- Finance Reviewer.
- Salesforce Administrator.
- Revenue Operations Lead.
- IT Governance or Change Manager.

Approval note: Signatures, organization names, and internal contact information are intentionally excluded from this public portfolio work sample.
