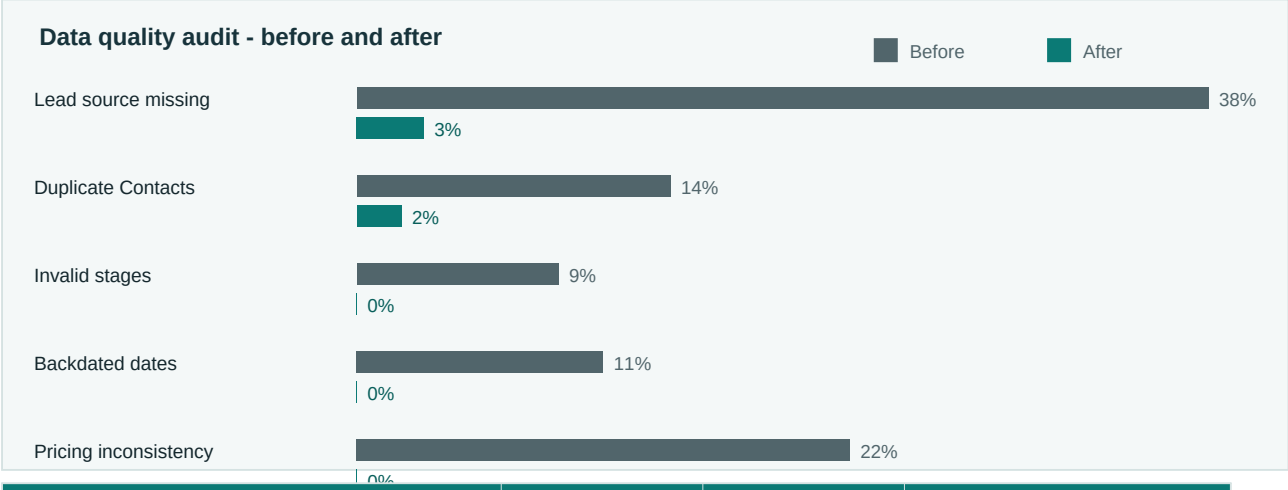
Data Quality Audit: Before and After

Validation, duplicate management, stewardship, and UAT controls

Work sample context: Sanitized professional work sample documenting Brian Lloyd's applied skills and experience. Organization-specific identifiers and confidential data have been removed.



Measure	Before	After	Improvement
Lead source missing	38%	3%	35 points
Duplicate Contacts	14%	2%	12 points
Invalid stages	9%	0%	9 points
Backdated dates	11%	0%	11 points
Pricing inconsistency	22%	0%	22 points

Audit scope

- Lead Source completeness and mapping.
- Contact duplicate prevention and stewardship.
- Opportunity stage and Close Date governance.
- Pricing consistency across governed records.

Controls applied

- Validation rules at record entry.
- Exact and fuzzy Contact matching logic.
- Record-triggered automation and error handling.
- Steward merge process and audit log.
- UAT designs covering standard, bypass, bulk, and fault scenarios.

Outcome

The control framework improved CRM reliability for forecasting, reporting, user adoption, and AI readiness while reducing duplicate outreach and avoidable exceptions.

Data note: Organization-specific records and identifiers have been removed. The percentages reflect the supplied professional work sample.
