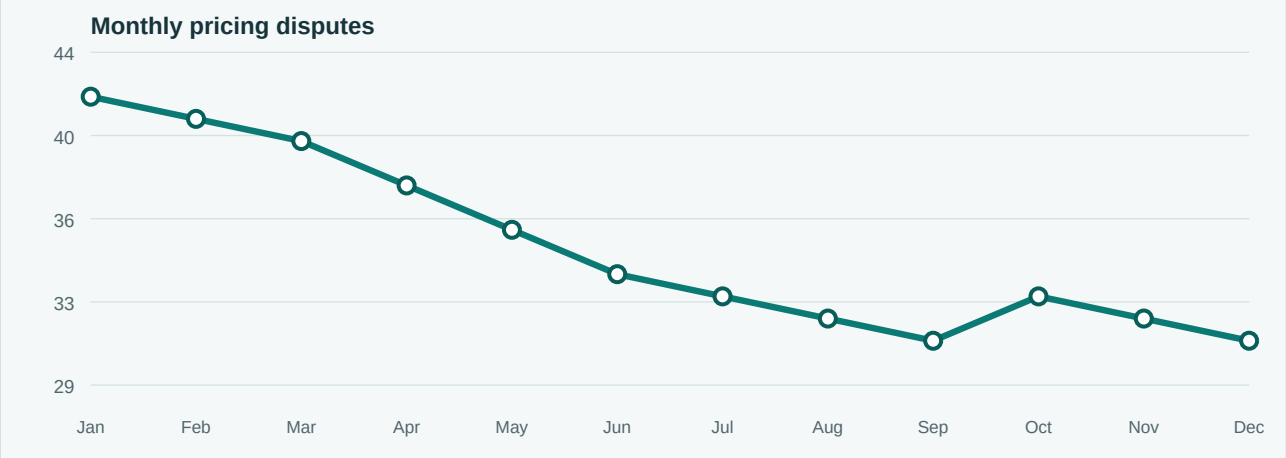
Pricing Dispute Trend Report

Twelve-month view of pricing-governance impact

Work sample context: Sanitized professional work sample documenting Brian Lloyd's applied skills and experience. Organization-specific identifiers and confidential data have been removed.

41	32	22%
Baseline average disputes per month	Post-control average disputes per month	Documented reduction



Analysis

Pricing disputes declined after SKU standardization, tier Price Book governance, range validation, exception routing, and automated Price Book Entry maintenance were embedded into daily operations.

Measurement method

- Baseline period: January through March, averaging 41 disputes per month.
- Transition period: April through June, during rollout and adoption.
- Post-control period: July through December, averaging 32 disputes per month.
- Reduction calculation: (41 - 32) / 41 = 21.95%, rounded to 22%.

Leadership value

- Stronger margin protection and fewer price escalations.
- Faster order processing and reduced manual reconciliation.
- More reliable reseller, pricing, and executive reporting.

Data note: The monthly series has been sanitized for public presentation while retaining the documented operating pattern and 22% outcome.
